We offer special range of designer light bulb in retro - tech style. The product of European manufacturers from Denmark and Switzerland. Incandescent bulbs are created by technology similar to the technology of Edison on ancestral recipes. Retro style. The main apparent in addition to lighting spectrum, etc. unlike conventional incandescent bulbs spiral light bulbs not so bright blinding the result of the vision of its beautiful pattern and soft light. Quite a magical sight. In addition to decorative effect, these lamps a unique source of light with a warmer and more natural range than any other electric lighting. Spectrum of light of this bulb is as close to the spectrum of sunlight, thus achieving high color reproduction is exactly the same as natural daylight. For example, compared with an incandescent lamp this led light consists of a much more narrow color spectrum. Such lamps are particularly popular in Scandinavia. Beautiful shape makes them ideal for use in lamps and chandeliers where the bulb is visible and there is a need for a strong impression of the design and
